Program Outline

The Forum of Indian Regulators (FOIR) and the School of Competition Law & Market Regulation, Indian Institute of Corporate Affairs (IICA) in collaboration with the Bank of Mauritius and the Financial Services Commission, Mauritius organized the first quarterly webinar of FOIR in form of a Virtual Conference on "Digital Assets Regulation in India: Learnings from the Mauritius Model Framework." on 27th August, 2020. The main agenda for the conference was to discuss the need for regulation of digital assets and to learn from the model framework adopted in Mauritius. The main purpose of the conference was to promote dialogue between Indian and Mauritius regulators to ensure coherence in the global regulation of digital assets.

The participants of the conference include chairpersons, members and officials from final sector regulators in India and FOIR member organizations.

Program Flow

The program began with a welcome speech by Dr. Abha Yadav, Associate Professor, School of Competition law & Market regulation & Director, FOIR Centre. She introduced the panelists and the chief guest and threw light on the relevance of the topic in the current scenario. Dr. Yadav further elaborated the format of the conference to the participants.

The introduction was followed by inaugural remarks by Mr. Sanoj Kumar Jha, Secretary CERC and Executive Secretary FOIR.

The conference began with opening note from Lord Desai, Member, British House of London and Emeritus Professor of Economics, London School of Economics and was followed by “Lead talk” by Ms. Loretta Jospeh, Fentech Advisor, FSC Mauritius. The presentation was accompanied by a Panel Discussion and Question–Answer round, where several questions were taken up from the participants by the moderator and efficiently answered by the panelists.

The participants received insights on the global perspective of regulation of Digital Assets adopted by several countries. The panelists and participants appreciated FOIR Centre & School of Competition Law and Market Regulation, IICA for organizing the conference & appreciated the program’s content.

The virtual conference ended with a vote of thanks by Dr. Abha Yadav, Associate Professor, School of Competition Law and Market Regulations and Director FOIR Centre (IICA)

Introduction to the Conference

The 21st century has seen transformation in the manner business is being conducted across the globe. The typical markets are now moving towards the online platforms, accelerating cross border exchange of goods and services. The same has sprouted reforms in the financial sector as well, leading to innovative mechanism for making payments on digital platforms. One such innovation is 'Digital Assets', involving the barter system of exchange.

The idea of digital currency is very new and not many people are well versed about it. The central banks around the globe are still exploring the implication of this technology. Governments across the globe have come with regulations to regulate the new assets class and Mauritius being the first ever jurisdiction to come up with the regulations on digital assets. However, the situation is not the same in India. The government and the regulatory agencies have so far not developed any specific law or policy for the regulation of the digital assets in the country. There stands no clear definition of digital assets including virtual currencies, crypto assets or cryptocurrency in any of the legislations.

The conference on "Digital Assets Regulation in India: Learnings from the Mauritius Model Framework" aims to promote discussion on the need for a digital assets regulation and help the Indian regulators learn from the experiences of the eminent panelists.

Opening Note by Lord Meghnad Desai

The conference began with the opening comments of Lord Meghnad Desai, Member, British House of Lords and Emeritus Professor of Economics, London School of Economics. He shared his experience of working on regulation of digital assets and stated that the Digital Assets are nothing to be feared about. They are mere technological developments and are mere tokens and should be treated as an asset class only. Lord Desai taking a balanced take on the subject stated that every technological advancement comes with its own merits and demerits. However, with stringent regulation the ill effects of the same can be controlled.

Lead Talk by Ms. Loretta Joseph

Ms. Loretta Joseph, Fintech Advisor FSC Mauritius laid the foundation for the conference with a small video clip on crypto currency and blockchain technology, (Link to the video- https://youtu.be/BdN_-EyB224).

In the course of the presentation she highlighted the merits of cryptocurrency and how these are different from legal tenders. While explaining the Mauritius Model and how Mauritius came up with the regulation, she stated that even in Mauritius the digital assets are not legal tenders and are merely treated as an asset class for the sophisticated investors. Ms. Loretta having drafted legislature in the subject stated that digital assets can easily be regulated with stringent legislations and that they are safe when it comes to security purpose. Drawing a comparison with legal tenders, she stated that legal tenders are tangible in nature and the same have difficulty in tracing the source. However, the bitcoins can be easily traced thereby minimizing the chances of corruption.

Panel Discussion

The Panel Discussion was moderated by Dr. Abha Yadav. In the panel discussion speaking on success of Mauritius framework for regulation of digital assets, Lord Desai stated Mauritius educated population and good governance being the reason for the successful implementation of the framework. He also stated that the people should have a belief and trust in the latest technological advancements, while answering the privacy concerns related to the technology. Speaking on the valuation of the digital assets, Lord Desai stated that bitcoins have no intrinsic values, they attain through transactions in the market by way of demand and supply. He also talked on the security aspects, the major concern of every central bank and regulator, and clarified that these assets and the transactions thereof is not anonymous in nature their source can be traced down easily and transactions are verified by network nodes through cryptography and recorded in a public distributed ledger called a blockchain.

Ms. Hemlata Sadhna Sewraj-Gopal, Second Deputy Governor, Bank of Mauritius also took the opportunity to explain to the participants in detail about the implementation aspect of the regulation. She highlighted the technological advancement undertaken by the Bank of Mauritius to be equipped enough to hold such currency and they are working on a project with IMF to strengthen it further. Ms. Hemlata Gopal while emphasizing on the advantages of Central Bank Digital Currency (CBDC) and its implementation stated that the Central Bank is planning to introduce their own digital currency and these currencies are cost effective and eliminates middlemen and is transparent in the process. CBDCs act as new variants of a central bank's liability denominated in an existing unit of account. As a result, they act as a store of value and medium of storage. While answering to questions pertaining to public acceptance of the new technology, she also stated that the bank in consultation with the committee has come up with guidelines "communiqué" to inform people about the asset class and the new regulation in place. These guidelines have maintained transparency and eradicate information issues pertaining to the new topic. She also gave a brief insight on E-KYC and that the Bank of Mauritius is working with experts to come up with a Regulation for the setting up of an online centralized Know Your Customer (KYC) database for the non-banking financial services sector

Ms. Loretta Joseph while highlighting the need of legislation for digital assets also highlighted that the legislation is uniform across the globe for easy application. Loretta while answering to a privacy infringement question stated that the provisions are made in central banks to install technological advanced measures in order to maintain ledger and keep the data safe from

any hacking or scam concerning the privacy issues. During the discourse, she stated that the cryptocurrency is a technological advancement and shouldn't be treated like a threat as the same can be regulated through government intervention.

Question – Answer Round

Post the Panel Discussion the house was left open for the participants. The participants raised questions and shared several observations and opinions on the emerging asset class and its regulatory issues. The panelists while answering to these questions spoke about how the customers or public are accepting the new technology and elaborated that the government and banks have been issuing guidelines for the public to educate the class on the knowhow of the technology while being transparent about the entire process. Lord Desai also explained the fact that these assets are like commodities and they cannot be legal tenders. He stated that the central banks work on liquid assets and if ever digital assets were to replace the currency the banking system might collapse for, they might face difficulty in cashless society. He further stated that these considerations need to include the fact that poorer populations may prefer cash and make heavy use of international remittances. Ms. Loretta while answering to a question pertaining to effectiveness of digital assets on ease of doing business asserted that these assets can be of real help in improving the conditions as these are real time transactions that are cost effective without any involvement of middlemen.

Vote of Thanks

The conference ended with a vote of thanks by Dr. Abha Yadav thanking the esteemed panelists and participants for sharing their knowledge and allowing the Indian counterparts learn from their experiences. She also thanked Bank of Mauritius and Financial Services Commission, Mauritius for their collaboration and support. The efforts of FOIR and IICA for the conference was also much appreciated by the panelists and the participants.
